**Head Teacher: Ms. Gillian Carver**

5<sup>th</sup> July 2021

Dear Parents/Carers,

Yesterday afternoon Sunday 4<sup>th</sup> July, we were advised that there has been a confirmed case(s) of COVID-19 within the staff population.

We are continuing to monitor the situation and are following government guidance. This letter is to inform you of the current situation and provide advice on how to support your young person. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

**Please note that your young person was not a contact of the member of staff who tested positive. St Ann's remains open and providing your young person stays well, he/she can continue to attend school as normal. We will keep this under review.**

**What to do if your young person develops symptoms of COVID 19:**

If your young person develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared.

All other household members who remain well must stay at home and not leave the house for 10 days.

The 10-day period starts from the day when the first person in the house became ill.

Household members should not go to work, school or public areas and exercise should be taken within the home.

Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

**Symptoms**

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your young person or anyone in the household does develop symptoms, you can seek advice from NHS 111 at:

<https://www.nhs.uk/conditions/coronavirus-covid-19/symptoms/> or by phoning 111.

**How to stop COVID-19 spreading**

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19.

**Hands**

- Wash your hands regularly and for at least 20 seconds.

**Face**

- Cover your face in enclosed spaces, especially where social distancing may be difficult and where you will come into contact with people you do not normally meet.
- It is now compulsory to wear cloth face coverings on public transport, in shops and several other indoor settings.

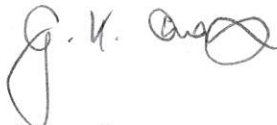

**Space**

- Stay 2 metres apart where possible, or 1 metre with extra precautions in place.
- Keep your distance from people who are outside your household.
- Limit social gatherings and avoid crowded places.

**Further Information**

Further information is available at: <https://www.gov.uk/coronavirus/education-and-young-personcare>

Yours sincerely,

Gillian Carver  
Headteacher.
